

SNIPSTORM EXPLORER

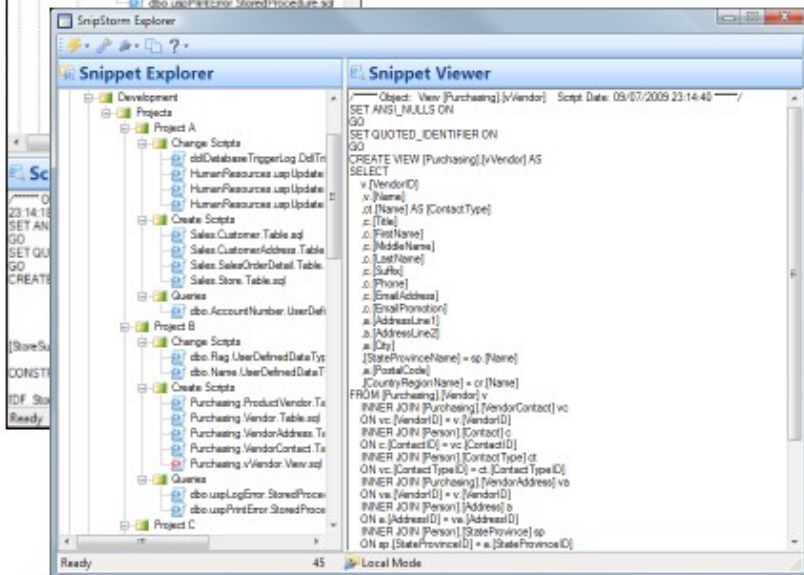

THE T-SQL SCRIPT EXPLORER

Many database developers have T-SQL scripts scattered across directories and folders. Finding that one script can be frustrating and time consuming. Enter SnipStorm Explorer. A Windows Explorer-like tool for T-SQL scripts. This unique application only displays scripts that are stored on your hard drive.

BENEFITS

- 
All Your Scripts One Click Away
 By simply clicking on a folder, SnipStorm Explorer will search that directory for all T-SQL snippets. Click on any script it finds to see it in the 'snippet viewer'.
- 
Save Time Searching for Scripts
 SnipStorm only show you what you are looking for...T-SQL scripts. Save time searching and looking inside each script by quickly and easily viewing scripts with one click.
- 
Online Storage & Access
 Alongside SnipStorm Explorer is SnipStorm.com. An online virtual briefcase and community for uploading, storing and sharing your shippets with others.

FEATURES

- 
Synchronization
 Keep your snippets up to date with the 'sync' feature.
- 
Explorer-like UI
 Explore folders for snippets with an 'Explorer' like interface.
- 
Drag & Drop, Copy & Paste
 Drag and drop snippets in SQL Server Management Studio. Cop and paste anywhere.
- 
SSMS Addin & Desktop Editions
 SnipStorm Explorer comes in two editons. A Windows desktop application and an SSMS addin for SQL Servr 2005 or 2008.

System Requirements

Microsoft SQL Server 2005/2008
 Microsoft Windows XP/Vista
 Microsoft Windows Server 2003/2008
